

A Doll's House

Why does the writer manage to create a happy impression:

- ✓ The writer should give all the natural relevant information.
- ✓ When he mentioned the place and the time that gives the happy impression which is Christmas Eve.
Unity of days = all the play in 2 days and half.
Unity of place = all the actions took place in the apartment.
Unity of action = in any good play you are given unity of action
- ✓ A natural development of the action must be spontaneous from A to B to C then should not be a surprise.
- ✓ The exposition or the introduction must contain the main elements like characters.
- ✓ The place tells us something about the realism of the writer as the middle class people must like in a small flat and have financial problems.
- ✓ Ibsen's play is a well-made one so we cannot remove any of the characters or the words. The theme or the message is the question one must ask himself after reading the play.
